

## Protect Your Equipment After Winter Service

You've invested in off-season maintenance for your equipment – now take the next step to **safeguard your investment**. Machinery is more complex and costly than ever, and even a single unexpected breakdown can disrupt your season and budget. Ag Guard Advantage is an extended service coverage plan that shields your machine from sudden failures and costly repairs.

## Plan Highlights

- **One-crop year, Spring to December 15<sup>th</sup>** (Extensions must be approved)
- **Our most comprehensive plan, Platform Coverage** (See detailed Terms & Conditions)
- **Choose between 300 or 500 hours of coverage** (100 or 500 hours under 80 HP)
- **\$500 deductible** (\$250 deductible under 80 HP)
- **Diminishing deductible on the next Contract after a claims-free year**
- **Contracts start after annual inspection and repairs are completed**
- **Not a reconditioning program - Coverage is for downtime failures**
- **Attaching equipment and damage caused by it is not covered**
- **Coverage for tractors, combines, sprayers, skid steers, mowers, and RTVs**

## Benefits

**Peace of Mind** – Operate confidently knowing you're shielded from sudden, expensive failures. After a thorough winter service, Ag Guard gives you an extra layer of security – no more worrying "what if?" during the busy planting or harvest season.

**Financial Security** – Avoid devastating repair bills for major component failures.

**Predictable Costs** – Enjoy stable, predictable ownership costs. Budget with confidence, instead of risking large unplanned repair bills.

**Proven Value** – You're making a smart investment by joining the many farmers who protect their equipment and financial stability with Ag Guard. When you choose Ag Guard, you're backed by 25+ years of industry experience and a provider known for fast claims and fair service.

## Special Offers

**Winter Protection Bundle** – Complete your winter service with coverage! You have the option to add Ag Guard extended coverage along with your winter inspection. This add-on ensures you're protected through the upcoming season – an effective way to avoid any surprises after your winter maintenance. (Ask your service team about winter bundle promotions and pricing.)

## Ready to Protect Your Investment Beyond Winter?

Talk to us today about adding Ag Guard Advantage coverage to your serviced equipment. Enjoy the coming season with worry-free operation, knowing your machinery is safeguarded against the unexpected.

See the detailed Equipment Service Contract Terms and Conditions for details and exclusions.

### Ag Guard is Not Bumper-to-Bumper or Comprehensive Coverage

- Designed for owners who maintain their machines diligently and follow manufacturer specifications
- Ag Guard coverage is not an insurance policy, and it is not a warranty
- Manufacturer warranties provide comprehensive coverage, while Ag Guard Extended Service Contracts extend that coverage for many but not all aspects of the machine
- Ag Guard does not cover existing failures or pre-existing conditions
- Ag Guard repairs what is broken rather than refurbishing or rebuilding to like-new condition
- The equipment owner can capitalize on the opportunity to approve work beyond what is covered by the Ag Guard Contract. We pay to fix the failure, and the owner would pay the difference.

### Ag Guard Coverage Excludes Certain Components

- The **owner is responsible for normal wear**. The following are **not** covered:
  - Emissions components
  - Wiring harnesses and electronic components
  - Adjustments and maintenance items
  - Software updates
  - Mileage, driving time, transportation, and field service costs
  - Failures resulting from misuse, abuse, or equipment modification
- **Leaks from seals and gaskets** are considered maintenance and are only covered if required to repair a covered failure
