Ag Guard is a proud sponsor of **MPA** Mom's Plus Tractor

Why Ag Guard?

We were the first company to offer third-party coverage on Ag equipment, and for over 20 years we have earned our unmatched reputation for treating folks right

Professional Grade Coverage Plans Designed for Business

You can manage the risks you can control and reserve for predictable breakdowns. We cover unexpected failures caused by defects in workmanship or materials—unpredictable expenses that can wreck your total cost of ownership.

Tailor coverage to fit your operation. Whether it's new, used, or equipment you already own—

YOU DECIDE:

Coverage Type*

Powertrain— Covers the internal components of the engine & drive train

Powertrain + Hydraulic— Adds pumps and other hydraulic components

Platform— Adds items like the starter, alternator, and A/C compressor

Years of Coverage: 1, 2, 3, or possibly more

Hours of Coverage: One-hour increments

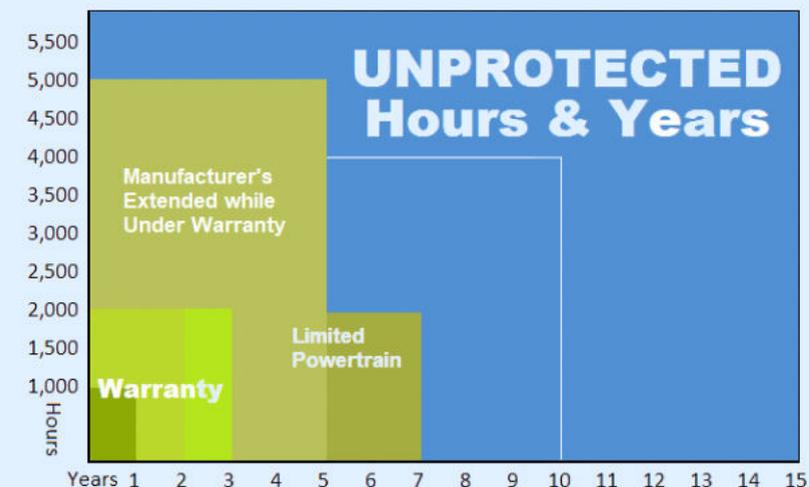

Deductible: \$0, \$250, \$500, or \$1,000

Fair Pricing

Our pricing is based on 20+ years of experience, not the market. We consider many factors like age, hours, use, and our claims experience to arrive at a dynamic price specific to your machine. This allows us to offer a fair price that provides true value. Sometimes everything is done right to maintain equipment and costly breakdowns caused by an unknown defect still happen. Ag Guard can help manage the risk of the unknown.

A Name You Can Trust

In our industry, a handshake still means something. Our success comes from always doing the right thing because the only way to succeed for over 20 years is to treat people fairly. When you call us, an expert answers the phone, not a call center, and we process claims fast. We genuinely care about your business, and our mission is to reduce your risk.
